1. Fill in the blank: A dashboard organizes information from multiple datasets into one central location. This enables the information to be _____. Select all that apply.

1 / 1 point

☐ protected

☒ visualized

✔ Correct

A dashboard is used to track, analyze, and visualize information.

☒ analyzed

✔ Correct

A dashboard is used to track, analyze, and visualize information.

☒ tracked

✔ Correct

A dashboard is used to track, analyze, and visualize information.

2. A data analyst is choosing their dashboard layout. They want the layout to automatically resize itself based on the dashboard size. They should use a tiled layout.

1 / 1 point

☒ True

☐ False

✔ Correct

To automatically resize the layout based on the dashboard size, the analyst should use a tiled layout.

3. What are some reasons why you might choose to use filters when creating a dashboard view? Select all that apply.

0.75 / 1 point

☒ To remove outliers that don't conform to your hypothesis

✘ This should not be selected

You might choose to use filters in order to highlight or hide individual data points or to zero in on what's important to your stakeholders.

☐ To put the data in chronological order

☒ To highlight individual data points

✔ Correct

You might choose to use filters in order to highlight individual data points or to zero in on what's important to your stakeholders.

☒ To zero in on what's important to your stakeholders

✔ Correct

You might choose to use filters in order to highlight individual data points or to zero in on what's important to your stakeholders.
