1. Which of the following queries contain subqueries? Select all that apply.   1 / 1 point

☑
```
SELECT
    first_name, last_name
FROM
    customers
WHERE
    customer_id NOT IN (SELECT customer_id
        FROM
            customers
        WHERE
            store = 704)
```

✓ **Correct**
The three queries with statements in parentheses contain subqueries.

☐
```
SELECT
    call
FROM
```

☑
```
SELECT
    employee_id
FROM
    employees
WHERE
    department_id IN (SELECT department_id
        FROM
            departments
        WHERE
            location_id = 1000)
```

✓ **Correct**
The three queries with statements in parentheses contain subqueries.

☑
```
SELECT
    price
FROM
    sales
WHERE
    price = (SELECT MAX(salary)
        FROM
            sales)
```

✓ **Correct**

2. Fill in the blank: A data analyst uses aliasing to make it easier to read and write a query. Aliasing involves temporarily _____ a table or column in a query.

1 / 1 point

○ copying

◉ naming

○ removing

○ hiding

✓ **Correct**
Aliasing involves temporarily naming a table or column in a query.

3. When working with subqueries, the outer query executes first.

1 / 1 point

○ True

◉ False

✓ **Correct**
The inner query executes first, then the results are passed onto the outer query to use.
